

Florida Southern College Frank Lloyd Wright Visitor Center

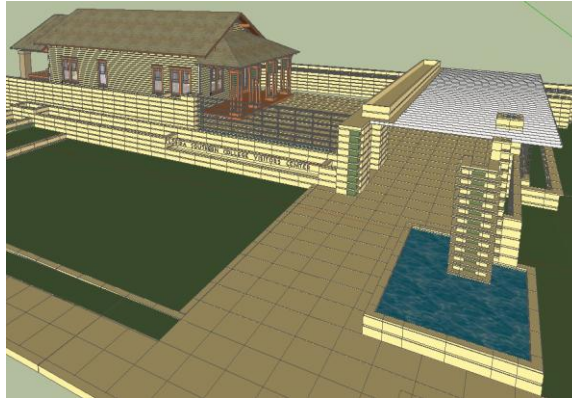

Lakeland, Florida

Low Impact Development Methodologies were implemented by JSK to help reduce storm water runoff concerns and increase the aesthetics of this Frank Lloyd Wright Tourism and Education Center on Florida Southern College's Campus.

Location:
Lakeland, Florida

Completion Date:
2011

Cost:
\$2,000,000

Working together with Florida Southern College, JSK helped to engineer and permit the site development of this Frank Lloyd Wright designed building. Using low impact development site materials such as pervious paving, underground stormwater management systems and Florida Friendly landscaping JSK helped to fulfill the College's residential approach to this project.

The services we provided included the following:

- *Civil/Environmental Engineering:* complete site development design, preparation of technical standards and specifications project manual; and construction management and administration.
