## Leoma's Landing Planned Unit Development

Lake Wales, Florida

*JSK Consulting, Inc. worked with the City of Lake Wales to design and construct potable water, wastewater and reclaimed water systems in support of this planned development along the U.S. 27 Corridor.*

JSK CONSULTING, INC.'s services for this project included the preparation, simulation and evaluation of a hydraulic model to analyze current and future potable water demands versus pressures within the City's Water Service Area. This project involved working in conjunction with several local regulatory agencies including: the Florida Department of Environmental Protection, Polk County Health Department, Polk County, and Southwest Water Management District.

The services we provided including the following:

- *Civil/Environmental Engineering:* complete site development design to include: paving, grading and drainage system design and permitting; multiple wastewater lift stations, gravity sewer collection systems and force main design and permitting; reclaimed water distribution system design and permitting; preparation of construction plans and a technical standards and specifications project manual; and construction management and administration.
