

Polk County Saddle Creek Fire Station

Lakeland, Florida

Part of our services included meeting with County staff on-site to review existing stormwater conveyance along Main Street fronting this proposed Emergency Services Facility.

Location:
Lakeland, Florida

Completion Date:
2011

Cost:
\$1,200,000

Engineering services for this project included evaluation of surrounding properties and County right-of-ways to review existing drainage patterns and flooding concerns. Working within the construction budget, JSK helped to design and permit cost efficient solutions to help address the County's concerns related to their existing right-of-way and surrounding properties.

The services we provided included the following:

- *Civil/Environmental Engineering:* complete site development design, preparation of technical standards and specifications project manual.
- *Construction Management:* participation in pre bid and pre construction meetings; addenda preparation; answering technical questions; and review of shop drawings.
